

Design Stencils for Axure RP

What's New with Stencil Version 1.66

With guideline version 1.66, we've created a new Axure RP stencil set for Fiori 3.

What does this mean?

- The theme has changed from Belize to Quartz Light.
- The scope is currently limited to a basic set of stencils that reflect core features of Fiori 3. More stencils will be added in upcoming releases.

Overview of stencils included

- Helpers: rem/px
- Foundation: grid / navigation / colors / shadow levels / typography
- Controls: footer toolbar / busy indicator / shell bar / product switch / cards
- Page types: Home

A stencil I need is missing – what can I do?

- If you have Sketch or Adobe XD installed, check if the stencil you need is available there:
 - [Design Stencils for Sketch](#)
 - [Design Stencils for Adobe XD](#)
- Use the foundation and helper components to build your own Fiori 3 stencils, or to adapt [existing stencils from Fiori 2](#). Refer to this [wiki](#) for the details of the Fiori 3 visual design.

Can I still use the previous Axure RP design stencil set with the Belize theme?

You can still use the old stencils, but you may need to adapt them to reflect the design changes introduced with Fiori 3 and the new [product standard for UX consistency](#).

To access the last version of the Belize stencils, go to [guideline version 1.62](#). Please note that the Axure RP Belize stencils are no longer updated.
