

Design Stencils for Sketch

What's New with Stencil Version 1.66

Foundation

- Shadows
 - Changed the shadow of the cards to the right shadow level, which is shadow level 0 (some cards had shadow level 1 before).
 - Deleted the shadow within the overview page header (there should just be a border above the tab bar, not an additional shadow).

Page Types (Floorplans)

- Home
 - Changed the text within the timeline card to a two-line text.
 - Added the Home spacing examples.
 - Some minor corrections.
- Wizard
 - Deleted the emphasized button from the footer toolbar.
- Overview Page (OVP)
 - Corrected shadow (see "Foundation").

Controls

- Product Switch
 - Changed text.
 - Corrected some bugs within the page (wrong product switch on some page examples, old shell bar design, etc.).
- Object Status
 - Deleted emphasized and value state object status based on feedback from the UX controls and visual design teams.
 - Updated the object status to reflect the current implementation.
- Slider
 - Added the slider with tick marks and label examples (hover + active).
 - Changed text within the page.
